

ABSTRACT OF THE DISCLOSURE

The invention relates to a ball joint for a motor vehicle, comprising a housing (6) having a cavity (5), and comprising a ball journal (1), which has a journal (2) and a joint ball (3) and which, with its joint ball (3), is mounted in the cavity (5) of the housing (6) in a manner that permits it to rotate and pivot. The journal (2) extends through an opening (7) provided in the housing and out therefrom. The inventive ball joint also comprises sealing bellows (11), which are placed between the housing (6) and the journal (2), and comprises a multipart measuring arrangement having at least one signal transmitter (17, 18) and at least one sensor (20, 21, 22), whereby the measuring arrangement is placed between the journal-side end of the joint ball (3) and the journal-side end of the sealing bellows (11).
